

Jennifer M. Katzenstein, PhD, ABPP-CN is a board-certified pediatric neuropsychologist, Director of Psychology and Neuropsychology at Johns Hopkins All Children's Hospital and an Assistant Professor of Psychiatry and Behavioral Sciences at Johns Hopkins School of Medicine.

She received her PhD from Indiana University – Purdue University Indianapolis in clinical psychology and completed her internship year and 2-year post-doctoral fellowship in pediatric neuropsychology at Texas Children's Hospital/Baylor College of Medicine. She then served as assistant professor of clinical neurology at Indiana University School of Medicine and pediatric neuropsychologist at Riley Hospital for Children.

She joined Johns Hopkins All Children's Hospital in 2015 to develop and grow the Neuropsychology Division and, subsequently, the Psychology Division. Her research has focused on neuropsychological outcomes in multiple childhood medical conditions, including the cognitive impact of concussion and neurocognitive late effects of treatments for pediatric cancer.

Clinically, she focuses on evaluating neurocognitive strengths and challenges of children with multiple medical conditions. She also works closely with schools and treatment teams to implement interventions to help maximize the educational potential and success of children.
